

Rooftop Support Systems  
by Clearline Technologies

## AP Series

C-Port Air-Port Utility Pads are made from 100% recycled rubber and designed as a non-penetrating economical and light-weight support safe for installation on any type of roofing material or other flat surface. Grooved, recessed tray design prevents movement and dampens vibration while providing a solid support for all electrical and HVAC equipment. The proprietary free-flow leg system allows for easy water passage beneath the equipment inhibiting the growth of harmful moss and mould. The UV resistant Air-Port is the perfect long-lasting alternative to roof-damaging heavy concrete curbing and pressure-treated wood blocks.

### Material

100% Recycled Rubber, UV Resistant

- Max Load** 1200 lbs
- Warranty** 10 years
- Recommended Spacing** Refer to local code

May qualify for L.E.E.D. credits

SKU	HEIGHT	WIDTH	LENGTH	WEIGHT
AP24	2" (51mm)	5" (127mm)	24" (610mm)	7 lbs
AP36	2" (51mm)	5" (127mm)	36" (914mm)	10.50 lbs
