

Rooftop Support Systems
by Clearline Technologies

CGW Series

The CGW Series is on our 12" x 12" low-profile wide body base, giving this support series superior stability and load-bearing capacity. The CGW can be glued down to the roof, and the mat provides an extra protective barrier between the rubber base and roof surface. These C-Ports come with your choice of a TPO (Thermoplastic-polyolefin), PVC (Polyvinyl chloride) or EPDM (ethylene propylene diene terpolymer) membrane. The CGW is designed for support of gas and refrigeration piping systems, cable tray, electrical conduit, multiple lines, HVAC equipment and many other applications.
